

## Solar Thermal on Patrimony Heritage Buildings

Category:	STO Ordinance Components
Tool-ID:	3.4.1
Type:	Recommendations
Date:	June 2010
Developer:	Lisboa E-Nova
Language(s):	English
Size:	5 pp
Description:	<p>Patrimony heritage buildings can be assessed as exemptions regarding the adoption of STOs. Although one can easily understand the importance of maintaining the historical patrimony, this exemption, often miss appropriated by investors and real state promoters in non considered buildings, incentives heritage buildings to not comply with the actual requirements for energy efficiency and comfort in residential buildings. This is clearly an inducement to the desertification and abandon of these areas, a common situation in several European countries. To overcome this tendency it is important to adapt residential building heritage to modern standards, including the possibility to integrate solar technologies.</p>
